

## EP2 A4 Size Machine

---

The EP2 is an extended version of the EP1 machine, allowing either an A4 or 2xA5 images to be processed simultaneously. The A4 film size optimize the use of economical desktop printers and allows either higher production rates or extended product range, for example e-readers and compact tablets.

The EP2 uses our standardized keyslot mounting system for jigs, with jigs being available to fit many of the most popular smartphone covers on the market. Mini-tablet and eReader jigs and consumables are also available on request.

The EP2 is supplied with five preset programmes plus a further 95 programmes that can be user edited as required.
